

PUMPS

QR Series - Pumps For Commercial Pools

Features:

- High efficiency self-priming centrifugal pumps with built-in extra large prefilter.
- Extremely quiet running and great reliability developed for water circulation.
- Pump body, prefilter & pump foot in PP.
- Strainer cover in see through polycarbonate to guarantee constant visibility and easy inspection.
- Pump prefilter body closed with knob system for easy accessibility.
- Diffuser & Impeller in PPO.
- Mechanical seal in SIC.
- Motor casing in die cast aluminum L2521.
- Asynchronous continuous duty 2-pole motor with F class insulation motor and terminal box protection rating: IP55.
- Ball bearings-water-proof, sealed, resistant to water and humidity.
- Standard voltage: three phase 230/400V 50Hz.
- Liquid temperature range: up to 50°C.
- Maximum ambient temperature: up to 50°C.
- Maximum operating pressure: 2,5 bar.
- Installation: fixed or portable in horizontal position.
- Union connectors with 110/90 mm BS pipe sockets.
