

Wonderla Park, Kerala

Project Details:

LOCATION

Kerala

AQVASTAR PRODUCTS USED

- Commercial Filter
- Pump
- Air Blower
- Valves
- Pipes & fittings

PROJECT OVERVIEW

Large pools with play features are designed to ensure that entertainment is taken care of while prioritizing safety.

CHALLENGES

Being highly crowded and heavy usage pools, keeping water quality to its best is a challenge.

CONSTRUCTION

Keeping project requirement/challenge in mind technically competitive equipment were considered. High quality water been ensured with best filtration system & sanitation methods.

Since too many equipment are involved in technical room, it was challenging our experience to place & locate without compromising hydraulic performances of all the equipment.

The pumproom is equipped with good ventilation to prevent equipment from overheating. Provided proper support for equipment and all pipes to ensure the highest standards are maintained.

RESULT

The combination of an air blower with the system not only makes the water healthier but also ensures that guests can enjoy the water without any worries about waterborne diseases.

Fig.1. All equipment / pipe, supported and intactness ensured.

Fig.2. Equipment are placed in a well-planned manner.
