

DECK BOX

- Deck mounted junction box for connecting the power cable between the light and the power source. Power source could be a driver/ Transformer or SMPS. The ASDB deck box has a square frame to make tiling easier and its double O'ring sealing system makes it IP65 - jet proof and water tight.
- This deck box allows the pool side connection around 12V /24 V cables from the source to join cables in an IP65 waterproof enclosure.

- Typically your power cable will be connected into one of the side sockets & the plastic conduit pipe which runs down to the light which connects into the bottom of the deck box and gets cable from light.
- The Junction Boxes are the best way to ensure watertight connections between cable inside the pool.
- Made from white ABS. IP65 weather protection has 3 threaded outlets of 3/4" Supplied with set of electrical connectors and threaded couplers. Size of the square lid: 149 x 149mm. Height: 79mm
