

MAINTENANCE EQUIPMENTS

Cleaning the swimming pool is a necessary but arduous task, Aqvastar Pro's range of pool care equipment aims to make it as easy and pleasurable as possible.

Pool Brush

Four rows of superior nylon bristle on a tough shaped polypropylene stock give the Pool brush the edge over all other brushes on the market. Guaranteed to give many years of service and not to be compared with cheaper alternatives.

PRODN	18" Deep leaf net, Made in the UK

Transflot Bicolor Pool Hose

Transparent piping with a spiral reinforcement in blue, highly flexible, manufactured from EVA (ethyl-vinyl-acetate)

- Its corrugated shape, rounded contours and its specific weight of 0.93 ensure its floatation when in operation
- Non-toxic material, but not for use with food
- Equipped with two connection terminals for bottom cleaning devices, one of them rotational, allowing for easy operation in manual as well as automatic modes
- Its Curvature Radius is two times its interior diameter
- High adhesion of the nozzles to the tube in case of mounting
- Withstands temperatures between -25°C and 60°C
- Available in lengths of 8, 10, 12 and 15 meters

Ref.Code	Product Details
PRO HS09	Highly flexible, opaque, UV resistant, self floating EVA Hose - 9 mtr
PRO HS12	Highly flexible, opaque, UV resistant, self floating EVA Hose - 12 mtr
PRO HS15	Highly flexible, opaque, UV resistant, self floating EVA Hose - 15 mtr

Telescopic pole

The grip lock mechanism enables easy adjustment of pole length and the comfortable hand grip makes use of the poles a real pleasure. The poles are designed for use with any of the Aqvastar Pro accessories as well as those manufactured by others. Available in size 8'-16' (2.44-4.88m).

Ref.Code	Product Details
PRO816	8-16' (2.4- 4.8 m) Telescopic handle, Made in the UK

Commercial Telescopic pole

Supplied in 10mtr (5-10 mtr) lengths, the poles may be used for commercial pools.

PRO1030	5-10 mtr Telescopic handle

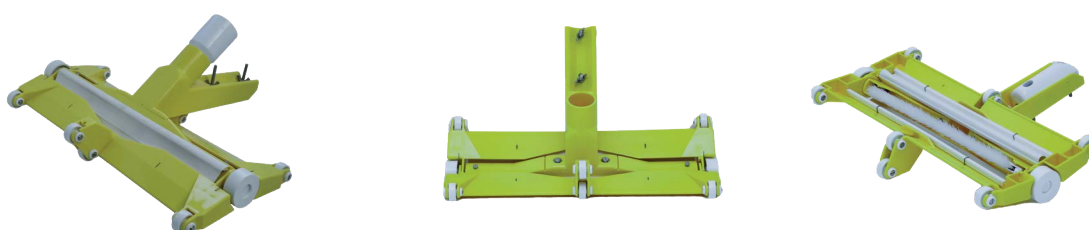

MAINTENANCE EQUIPMENTS

The Fairlocks vacuum head

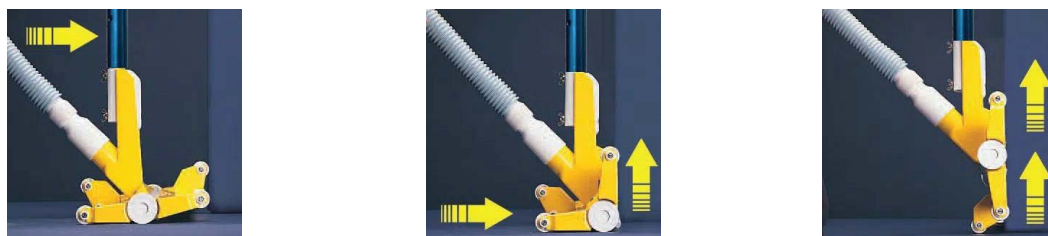

Streamlined for speed - hinged for angles & walls.
1 1/2 and 2 inch hose.

The most efficient pool cleaning system

The tough polycarbonate streamlined shape enables faster sweeping to the best effect.
The centrally mounted 19" brush even enables solid debris to enter the suction stream that others leave behind.

As the head meets the pool side, the leading wheels force it to articulate, so that the brush cleans right into the corner.

From the corner, the head rises up the wall with no loss of efficiency. It works on both vertical and horizontal surfaces without need for adjustment.

The Fairlocks unique design makes it the most efficient pool cleaning system in its class.

We have given it a carefully streamlined shape to move faster without stirring up nearby leaves and debris so it uses all the power from the pool's filtration pump to best effect.

The 19" wide centrally mounted brush even enables solid debris to enter the suction stream which others leave behind. The Fairlocks unique articulation makes sure the brush gets right into the corners as well as the sides.

Features

- For industrial, sanitary and special use in swimming pools.
- Smooth internal and external surfaces. Highly flexible and light.
- External diameters adjusted to ensure easy assembly on PVC fittings with adhesive and PVC with elastic seal, as well as PP fittings.
- Hermetically sealed and resistant at joint up to pressure of 30 bar.
- Good chemical resistance associated with PVC's resistance chart.
- Great resistance to waste water and chlorinated swimming pool water.
- Withstands temperatures between -10°C and 60°C.
- Hose with AENOR N MARK product certification in accordance with UNE-EN ISO 3994, category T2.
