

**INTELLIGENT
WATER SYSTEMS.
DELIVERED
SEAMLESSLY**

At Aquastar, we harness the power of water to deliver innovative, sustainable solutions, driven by crystal-clear integrity, cutting-edge engineering, and an unwavering commitment to quality in every drop.

**WE KEEP THINGS SIMPLE :
CLEAN WATER, CLEAR VALUES,
AND SOLUTIONS THAT WORK JUST
AS HARD AS WE DO.**

ABOUT US

Where expertise meets water

Founded in 2015, Aqvastar is one of India's leading experts in advanced swimming pool systems, water features, and wellness infrastructure. Headquartered in Bangalore, with offices in Delhi, residential managers in Hyderabad and Mumbai, and a pan-India presence, we serve over 200+ pool builders across the country and are expanding into international markets, including the Far East.

Our 45-member team blends engineering precision with creative water design, offering custom solutions for residential, commercial, institutional, and competitive aquatic environments. From cutting-edge inverter heat pumps and 1-micron filtration to Olympic-grade competition equipment and water-saving technologies, our portfolio reflects innovation, quality, and sustainability.

With a decade of experience and an unwavering commitment to service, Aqvastar is not just a product supplier - we are a technical partner, a design consultant, and a trusted advisor to India's top developers, architects, and public infrastructure agencies. We provide expert design support (With reference of SPATA, Swimming pool code of India) along with an unbiased bill of quantities, enabling different builders and clients to follow clear guidelines and offer equivalent, comparable quotes.

Aqvastar is the only company in the country with four large warehouses to ensure timely delivery.

**WE'RE HERE TO REDEFINE WHAT WATER CAN DO —
AND WHAT YOUR PROJECT CAN BECOME.**

MISSION: To design and deliver advanced, efficient, and sustainable aquatic systems that transform your water systems into meaningful experiences, through engineering excellence, customer-first service, and dedicated technical support.

VISION: By 2030, Aqvastar aims to become India's most trusted water systems brand — leading innovation in pool technology, expanding across global markets, and contributing to India's Olympic dream by identifying promising swimming talent and investing in world-class training and technology to help bring an Indian swimmer to the Olympic podium.

OUR SERVICES

Solutions that flow with you

At Aqvastar, we specialize in more than just swimming pools — we bring water to life through high-quality, technically advanced solutions tailored to your vision. Whether you're planning a luxurious residential pool, a large-scale commercial feature, or a full landscape irrigation system, **our expertise spans the entire journey — from initial concept and schematic design to seamless product supply and technical support.** As water feature specialists, we ensure every element is thoughtfully selected and flawlessly executed to reflect your unique space and purpose.

Our systems are built to be smarter and more sustainable: they save water with less backwash, retain heat through advanced covers, and minimize chemical usage with next-gen filtration. Combine that with our industry-best after-sales service and fast spare parts availability, and it's no surprise why we're trusted by over 200 builders and developers nationwide.

We're also proud to be innovators. Aqvastar offers exclusive technologies like inverter heat pumps, 1-micron filtration systems, and 24V high-flow counter-current units—products not easily found elsewhere in the market.

BUILT ON KNOWLEDGE. SUSTAINED BY SERVICE.

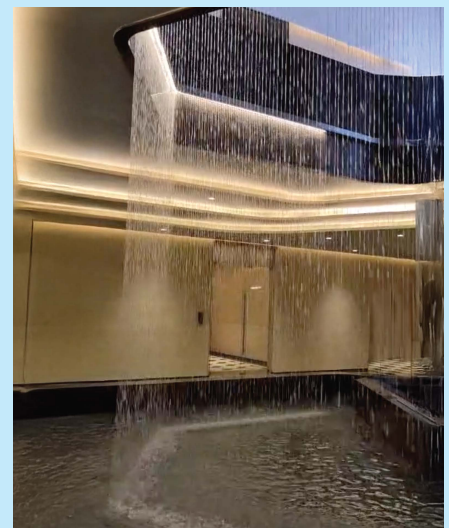

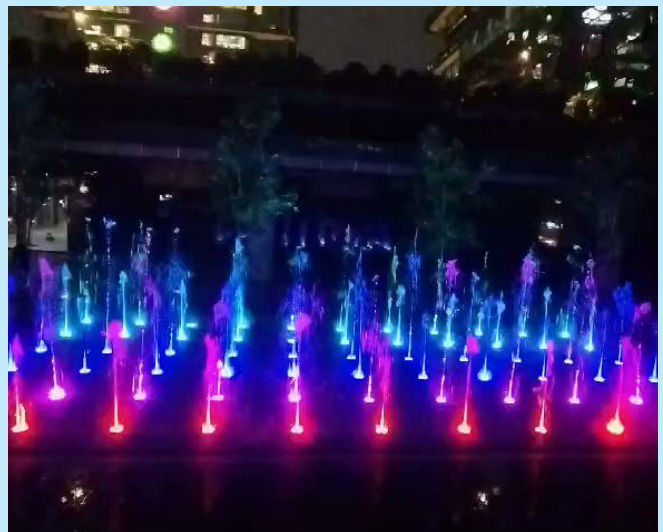

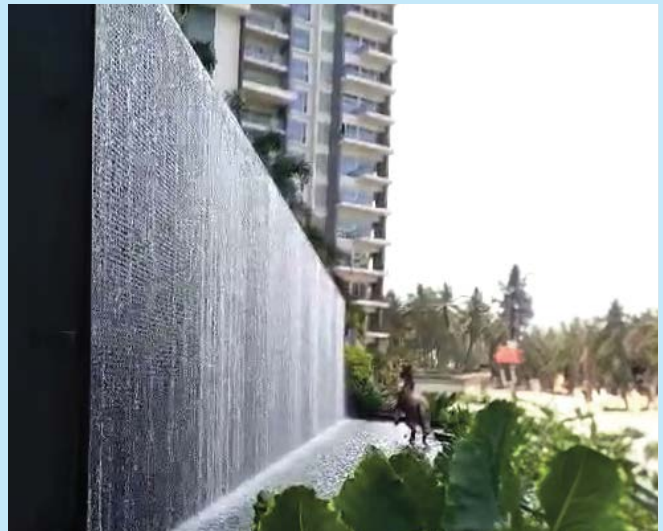

Innovating Water Fountain Experiences

At Aqvastar, we believe water is more than a medium — it's a canvas for creativity and innovation. Our design philosophy is inspired by a deep curiosity and multidisciplinary approach that explores water's full potential.

From conceptual models to immersive installations, we continuously experiment, prototype, and innovate to redefine water features.

Our commitment extends to sustainability. Through dedicated R&D, we focus on reducing water and energy consumption while enhancing the aesthetic and functional performance of every design. This balance of creativity and conservation drives our next generation of water experiences.

LEADING IN DESIGN CONSULTANCY

Let your pool be a true reflection of who you are.

At Aquvistar, we help build pool systems that are efficient, sustainable, and built to last, thanks to our expert design team and technical support specialists. Our role begins long before installation. From the earliest planning stages, we work closely with architects, consultants, and contractors - studying briefs, mapping hydraulics, flagging design risks, and ensuring system compatibility across all variables.

What truly sets us apart is our engineering-first approach. Our technical support doesn't just guide installations — it actively helps clients save money by recommending correctly sized products and pipework that reduce operational costs from day one. Electrical cabling is very critical as these are low voltage & installation needs comprehensive study to ensure better illumination & longer product life.

We don't just suggest products; we help decode technical requirements, fine-tune layouts, and build systems around real-world conditions. Every product is correctly selected, every flow path is optimized, and every element is designed for reliable performance over time. It's how we help our clients reduce excess costs and avoid installation errors.

WE DELIVER SYSTEMS THAT ARE NOT JUST FUNCTIONAL AND EXQUISITE, BUT ALSO FUTURE-READY.

AFTER SALES SUPPORT

Support that moves with you

Beyond the system itself, we're known for staying involved long after handover. Our support doesn't end when the system is switched on. We provide ongoing service, troubleshooting, and site-level advisory—backed by ample spare parts availability across the industry to ensure fast delivery. Our support team is responsive, informed, and always ready to assist—whether it's guiding on maintenance practices or visiting a site when needed. With a strong, proactive stock system and consistently available components, we've earned a reputation for making replacements and additions seamless.

Installation & Commissioning Support

Aqvastar ensures seamless execution through expert installation and commissioning support. Our technical team works closely with clients and contractors to implement the following specialized products with precision:

- **Automatic Pool Covers** – End-to-end support, from design guidance to final commissioning.
- **Interactive Jets** – Expert assistance in programming and commissioning.
- **Heat Pumps & Inverter Heat Pumps** – Technical guidance for correct installation, commissioning, and system programming.
- **Automatic Multiport Valves** – On-site commissioning support to ensure correct functionality and performance.

This hands-on approach ensures that every product operates at its best — delivering long-term reliability, efficiency, and value.

**IT'S THIS COMBINATION OF THOUGHTFUL DESIGN SUPPORT
AND RELENTLESS AFTERCARE THAT MAKES AQVASTAR NOT
JUST A SUPPLIER, BUT A TRUSTED, LONG-TERM ALLY.**

CLIENTELE AND PARTNERSHIPS:

Relationships built on trust

For 10 years, Aqvastar has earned the trust of leading builders in every major Indian city. From landmark high-rises to elite educational campuses, from pools on high rise roofs to irrigation plans for business parks, our products and support have shaped aquatic experiences across the country. We're proud to be the brand behind the largest Olympic pool project at NACIN, and the silent force behind numerous school pools and visually stunning IT park entrances brought to life with our design-led water features. With a growing network of 200+ pool builders nationwide, and a small but expanding footprint in the Far East, our reach is both local and global. Our international partners don't just work with us, they believe in us. So much so that any inquiry they receive from India is sent directly to us, with confidence that Aqvastar will deliver every single time.

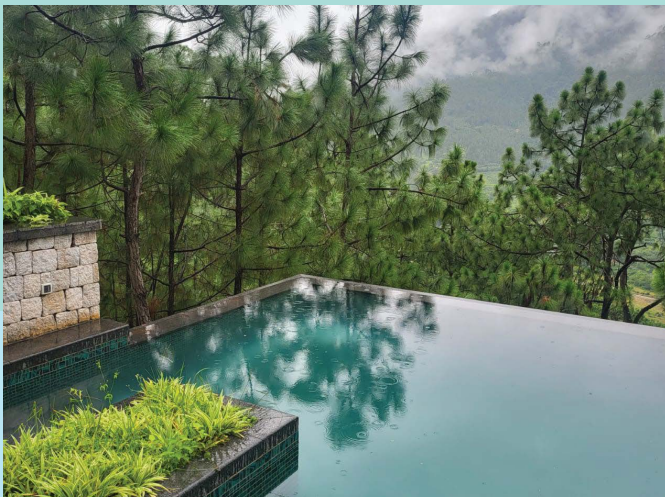

Above Products are also marketed by Aqvastar

OUR PROJECT PORTFOLIO

Fiber optic installed in Hyderabad

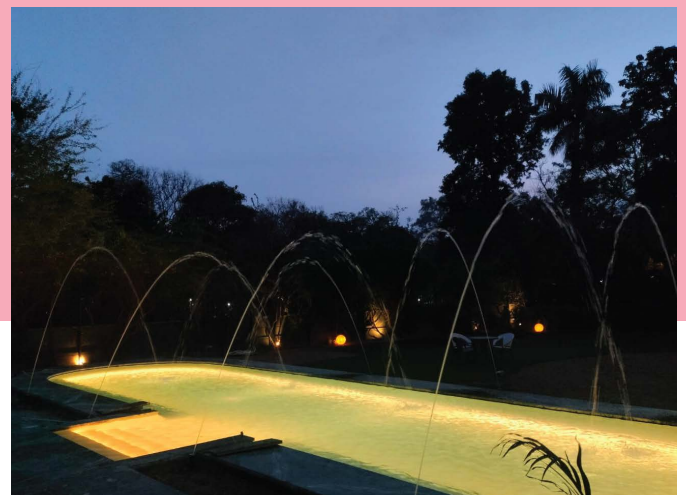

ANTI competition equipment at Bihar's first sports academy

Swimming pool at Art Village, Chouk, Karjat

Automatic Pool cover installed in RD House, Africa

Strip light installed in Chandigarh

GROWTH AND ACHIEVEMENTS

Where we're going, together

Since 2015, Aqvastar has grown; not by chasing scale, but by perfecting systems and building trust. Our team has expanded steadily to 45 dedicated professionals, each bringing expertise and energy to every project. With an expected turnover of ₹60+ crores in FY 2025–26, Aqvastar is now a leader in product volume, customer retention, and solution-driven execution. Our exclusive partnerships with global suppliers are built on mutual trust; when their Indian leads need hands-on support, they point them to us. Because they know what we've always believed: Aqvastar doesn't just sell — we solve.

By 2030, we aim to cross ₹100 crores in turnover, expand operations into the Middle East and Far East, and play a part in putting an Indian swimmer on the Olympic podium — a vision that powers our CSR efforts. We're actively working with international partners to set up knowledge-sharing platforms and joint facilities that will uplift the entire pool industry in India. A dedicated training academy is also in the works to bring world-class expertise to local professionals.

**THE FUTURE AT AQVASTAR ISN'T JUST ABOUT BUSINESS;
IT'S ABOUT IMPACT.**

SUSTAINABILITY

Green thinking. Blue systems.

We believe sustainability isn't a label — it's a responsibility. Our products are already built for the future with energy-efficient operations, low water usage, and advanced filtration that reduces chemical dependency. Every system we offer helps clients lower their ecological footprint while enhancing performance. It's our way of building better, responsibly.

Aqvastar believes in maintaining every pool project with bathable water. We also work to ensure that every pool is properly monitored and managed with the right expertise. With our innovative products and solutions, Aquvastar ensures that customers always enjoy clean, safe, and bathable water in their pools.

TEAM & LEADERSHIP

Mr. Muthu Venkata Selvam
Co-Founder

Mr. Sadasivam
Co-Founder

Muthu Venkata Selvam is the driving force behind Aqvastar, leading with strategic vision, technical expertise, and a commitment to innovation and global growth — bringing decades of experience in engineering precision for water systems and expertise in client relations and strategy-driven growth. With Mr. Muthu's seamless and strategically driven workflow at the helm, co-founder **Mr. Sadasivam** complements this vision by ensuring operational co-operation, reliability, and unwavering dedication. He also supports the company culture rooted in responsiveness, quality, and deep technical insight.

Behind Aqvastar is a team of 45 professionals driven by purpose, not politics. Our culture is clean, clear, and collaborative, a team that realizes the efficiency of the process and the beauty in results. We believe a great company isn't built just on strong systems, but on strong people — which is why we invest in continuous product training, design skill-building, and internal growth. Our leadership believes in flat hierarchy and direct communication, so ideas move fast and support reaches clients without friction.

TESTIMONIALS

■ **Mr. Thimmaiah.T.M.,**

Director - Techno-Commercial Miracle Pools Pvt Ltd

We want you to know that we are very pleased with the quality of the products and services your company provides. We sincerely appreciate your responsiveness and the way you conduct business. Your staff and technical team have consistently made extra efforts to assist us in completing our projects on time.

■ **Yunus Y. Sayyed,**

Planet Pools & Spas Pvt. Ltd

I have been in the swimming pool & spa industry for over 20 years to date. The feedback I have received & the pools & spas I have completed using the 'Aqvastar' has been nothing but outstanding. Also, the service you give us is worth mentioning - as it is excellent.

■ **Mr. Rémy Bouchardy,**

Export Manager - Next Pool Group

Working with Aqvastar has always been easy and smooth. Very good communication with the team in charge who is very keen on perfectly knowing our products to offer the best solution to its customers. A trustful and committed partner in India

■ **Kiran Kulkarni,**

Unique Pool Systems- Pune

'Aqvastar' is our pool & water-body equipment supplier since 2014, Their products' dependability is something we deeply appreciate. Not only have they provided top quality products in a timely manner, but their staff is also co-operative & knowledgeable. We deeply appreciate our collaboration & would like to continue with it. We strongly recommend their name & products for our clients as well as new customers

■ **Manjunath Shenoy - Partner,**

Lagoon Pools & Spa

For the last 6 years with us, they are good professionals, flexible, and immediate service providers immensely acclaimed in the industry owing to their preciseness, which is crucial whenever we have to make urgent decisions to capture the business opportunity. Aqvastar takes care of everything including the quality and their pricing is more competitive.
